Pre-Laser Treatment Instructions

- We are unable to do a laser treatment for you if you are nursing or pregnant.
- We are unable to treat if you have a history of Gold Shots.
- Avoid direct sunlight 4 weeks prior to your laser treatment. Direct application of sunscreen, SPF 15 or greater, is recommended in the area of treatment.
- No self-tanners one week prior to laser treatment.
- If you have an active cold sore, we will be unable to do a laser treatment until it heals.
- If you have a history of cold sores in the lip or mouth area, please pre-treat with antiviral medication 3 days prior to injection. We would like you to continue treating post laser for an additional 4 days to total 7 days of treatment.
- Must be off Accutane 12 months prior to injections.

**If you have any additional questions or concerns, please call our office at
(616) 888-3100.**
